LUE ACRE WILL SINK THREE SHAFTS

ins O. K. on West and Has Similar Surface Showings.

AS AN ACRE OF BLUE ROCK

orking Force Will be Materially Increased to Explore Three

Henry M. Crowther of the Blue Acre ining company who returned yester. y from an inspection of its holdings ports excellent showings on the pro-rty and preperations being made to terially increase its working force. This property contains 320 acres lyjust west of the O. K. mine belongto the Majestic company and the ldings of the Beaver Consolidated npany near Milford. It received its me from an area of about 1 acre of ck which is colored blue from copper ains. At present work is being pushin three shafts on as many east and at veins, two of which are now down out 50 feet and the other has a depth
20 feet.

Surface showings have yielded as uch as from 12 to 26 per cent copper, uch as from 12 to 26 per cent copper, id depth is expected to reveal better itues in permanent bodies. One of the afts now being sunk is located about 1 feet from the new shaft in the O. K. hich is west of the original incline om which such good results have been tained and the belief is that a similar dy will be found on the same vein on the Rive Acre ground.

dy will be found on the same vein on e Blue Acre ground.

Mr. Crowther states that the perrmance of the O. K. Mine is unparalled in copper mining in that the great dies have been encountered at a pth of only 200 feet. A repetition of is condition is hoped for on the Blue re ground, but if it is not found e company is prepared to sink to a uch greater depth.

GOLDEN QUEEN ASSAYS. arysvale Samples Carry Good

Values in Silver and Gold, The Golden Queen Mining company h offices in Provo and holdings near arysvale reports favorable returns om two 50-pound samples taken from e company's grounds. From one mple an assay showed 13 ounces of lver and \$295.58 in gold to the ton, hile the other carried 52 ounces of siler and \$10.18 in gold. These samples ut 50 feet more work.

ONDS IRON COUNTY CLAIMS.

Up Silver King Group. The Silver King group of fine claims tuated west of Lund in the Wah Wah inge, has been held up with a bond by N. Morrison, Charles Morrison and hers associated with them. The propty belonged to Messrs, Blackburn and liton and its development will be be-in at once. It is located 35 miles south the famous Horn Silver mine and is

PLEASED WITH GOODSELL.

Manager Reports Property at American Fork Producing Ore.

W. L. Goodsell of the Goodsell Mining company, with property in American Fork canyon, has returned from a several days' stay at camp. He reports the sacking of ore from the ining. The incline is following a vein which is in places 75 feet wide, mostly mineralized, with a fair showing of shipping ore. The value of the ore is creasing with depth and a large mass milling ore has been encountered. The work of development will continue through the winter and for which preparations have been completed,

SURVEY OF COLUMBUS. Preparations Completed for Winter's Campaign.

Arthur E. Snow has returned from several days' stay at Alta, where the Columbus in which he is interested is having made a survey for patent of its 3 claims. Preparations are completed for working the property through the winter. A new boller has been in-stalled and a compressor is being taken

Mr. Browniee Goes East.

H. C. Brownee of the St. Louis Ontario at Park City came down from camp last night and will leave for St. Louis in a day or two to confer with eastern shareholders. He reports the property as responding well to an in-

POLITICS OF THE NEXT CONGRESS

It is Not Likely to be Materially Changed-The Senate Will Remain Republican No Matter How the House May Be Affected by the Election.

The senate will remain Republican no been chosen in Oregon and will select a successor to Senator Simon. It is conmatter how the house may be affected by the November elections: The Democrats may gain a number of senators, but the Republicans have such a large majority that it cannot be overcome. Nearly one-third of the senators will

be chosen by state legislatures this wintetr. A few have already been re-elected and others are certain of retaining their seats. A. C. Latimer has been designated to succeed Senator McLaurin of South Carolina. Arthur P. Gor-man was elected in place of Senator Wellington, James B. McCreary will follow Senator Deboe from Kentucky and ex-Governor Clarke of Arkansas will succeed Senator Jones. Senator Allison has already been elected. In Gorman and McCreary the Democrats gain two votes. Foraker of Ohio and Dillingham of Vermont, Republicans, have been re-elected.

It is regarded as practically certain that the Democrats will elect a successor to Senator Pritchard of North Car-olina, and the Republicans expect to a successor to Senator Harris of Kansas.

Senator Teller is fighting to succeed himself in Colorado, while the Republi-cans, led by ex-Senator Wolcott, are seeking to control the state. Mr. Tel-ler will have the support of the Silver Republicans and the Democrats and is

reasonably sure of success.

Senator Vest has refused a re-election and a Democrat will be sent from Missouri in his place. Senator Jones of Nevada has also declined another term, and indications are that Representative Newlands, a Democrat, will obtain the vacant seat. This means the loss of another Republican vote. A Republican legislature has already

ceded that Representative Hopkins will come to the senate from Illinois to fill the seat now occupied by Senator Ma-son, and that Gen. Alger will be elected as successor to Senator McMillan, Senator Kittridge is sure of election from South Dakota, having been indorsed by the Republican state con-

Delaware may send either two Democrats or two Republicans to the senate. Factional controversies among the Republicans lead the Democrats to hope for victory.

The Republicans expect either to elect

Senator Perkins for another term from California or to name his successor. They also figure on certainly controlling the election of senators from Washington and Utah, both the present i bents being Democratas, and are fighting to gain a seat in Idaho, where Sen-ator Heitfield is working for re-election If the Republicans, as seems assur-ed, gain seats in Washington, Kan as and Utah, they will offset the three certain Democratic gains, from Kentucky, Maryland and Nevada. If the Democrats, then, are successful in North Carolina and Delaware, they will only reduce the present Republican major-ity in the senate by three votes. The Republican senators who are seeking re-election and seem sure of controlling their state, but against whom Demo-crats are making a determined fight, are Fairbanks of Indiana and Hans-borough of North Dakota.

Senators Platt of Connecticut, Galli-gher of New Hampshire, Platt of New York, Penrose of Pennsylvania and Spooner of Wisconsin seem to have good chances either of succeeding them. selves or having Republicans selected as their successors.—New York World.

ANOTHER BUNCO GAME. Sucker" Bit es and Comes Out Loser

Yesterday a couple of grafters in-

duced Julius Krodch to enter into the old "match game." One of the grafters, Fred Miller, explained to Krodeh how easy it would be to "skin" the third man whom they would meet in a few minutes. Krodeh jumped at the chance to make some easy money. For a time Krodeh and Miller seemed to win when suddenly luck changed and the strang-er won \$35 from Krodch and all that willer had. Then Miller and the unknown walked away together, divided the \$35 and laughed. Krodch told his troubles to a policeman. All the solace he got was to be arrested for gambling. Sergeant Roberts located Miller and arrested him on the same charge. The third man has not been found yet. In addition to loosing his money for acting the role of the "sucker" Krodch is to be presecuted for gambling.

WIFE BEATING CASE.

In Judge Diehl's court yesterday af-ternoon Eugene White, an expressman,

was tried on the charge of striking his wife on the head with a plate. wife on the head with a plate.

Mrs. White and her young son testified that White came home drunk and began abusing his wife. He then struck her on the head with a plate. White said he got "mad" because dinner was not ready when he went home. He was found not guilty and Judge Diehl ordered him discharged.

INJURED IN JAIL.

City Prisoner Seized With Epileptic Fits and Badly Hurt.

Yesterday Officer Johnson arrested on the charge of vagrancy, M. A. Isaacs, a well dressed man who claims his vocation is that of cigar maker. He was thrown into jail, where he was seized with epileptic fits, from which he has been a sufferer for some time. During one of the attacks he fell to the hard loor and inflicted a terrible wound in the back of his head. A physician was summoned and the wounds were dressed, after which the unfortunate man was given his liberty, no com-plaint being filed against him.

ANTHRACITE MINE WORKERS' CASE.

Statement of Their Side Filed With The Commission.

THEIR DEMANDS SET FORTH

Same as These Formulated by the Shamokin Convention, Held March 19-24, 1902.

Hazleton, Pa., Nov. 4.-The statement of the anthracite mine workers' case which was filed with the strike commission on Sunday night was made public today. Copies of the statement have been furnished to the operators, who will reply in three or four days. The miners' statement in full is as

"To the Anthracite Coal Strike Commission: The mine workers make of the operators the following demands which were formulated by the Shamo-lin convention, held March 19-24, and or the enforcement of which the strike was inaugurated:

INCREASED WAGES. "First-An increase of 20 per cent up-

on the prices paid during the year 1901 to employes performing contract or plece work. This demand is made on account of the following reasons: "1-The present rate of wages is much lower than the rate of wages paid in the bituminous coal fields for substantially similar work. "2-The present rate of wages is low-er than is paid in other occupations re-

quiring equal skill and training. "3-The average annual earnings in the anthracite coal fields are much less than the average annual earnings in the bituminous coal fields for substantially similar work.

"4-The average annual earnings in the anthracite coal fields are much less than the average annual earnings for occupations requiring equal skill and "5-The rate of wages in the anthracite coal fields is insufficient to com-

pensate the mine workers in view of the dangerous character of the occupation in relation to accidents, the lia-bility to serious and permanent disease, the high death rate and the short grade life incident to this employment. "6-The annual earnings of the mine workers are insufficient to maintain the American standard of living.
"7-The increased cost of living has

ent wages and has not only prevented the mine workers from securing any benefit from increased prosperity, but has made their condition poorer on account of it.
"8-The wages of the anthracite mine workers are so low that their children are permanently forced into the break-

made it impossible to maintain a fair standard of life upon the basis of pres-

ers and mills instead of being support-ed and educated upon the earnings of their parents.
"9-Wages are below the fair and just earnings of mine workers in this in-

SHORTER HOURS.

Second-A reduction of 20 per cent hours of labor, without any redu of earnings for all employes paid by it, hour, days or weeks. The second de-mand is similar to the first, in that it is designed to increase the hourly of wages of mine workers employed by the hour, day or week, and all the rea-sons applicable to the first demand are asked to be applied to the second with

'In addition we submit the following "10-The 10-hour day is detrimental to the health, life, safety and well-being of the mine workers. "11—Shorter hours improve the physical, mental and moral conditions of the

workers.
"12-Shorter hours increase the intensity and efficiency of labor.
"13—The tendency of national and state government of organized trade and production generally is toward

shorter hours.
"14—A working day of eight hours is sufficiently long for the best interests of the working men and of the communi-

which coal shall be weighed and paid for by weight whenever practicable; the minimum rate per ton to be 60 cents for a legal ton of 2,240 pounds; the differentials now existing at the various mines to be maintained.

REASONS FOR DEMAND.

'This demand is made on account of following reasons:

Measurement by the legal ton wherer practicable is the only honest and just system of measuring the earnings of mine workers. 2. When the operators sell or transIT IS DOUBTFUL

If Local Applications Alone Ever Cured a Case of Catarrh.

Most remedies for the treatment of catarrh are in the form of sprays, in-halers, powders, washes or salves, all purely local applications and many of them often give temporary relief, but the reason none of them ever really cure chronic catarrh is because catarrh is not a local disease and it cannot be cured simply by treating the local symptoms.

Moreover the more serious forms of catarrh, like catarrh of the stomach and catarrh of the bronchial tubes, cannot be reached at all by local applications and the fact that neglected ca-tarrh of the head very soon involves the bronchial tubes, stomach and liver, demonstrates that the disease is a blood disorder, a constitutional malady and not at all a local disease.

To really cure catarrhal poison by an internal remedy which acts effectively

upon the blood and liver.
The success of a new catarrh remedy Stuart's Catarrh Tablets, is because drives out of the system, through nat ural channels, the catarrhal poison and the mucous lining of the nose, throat and trachea are freed from the excessive mucus which collects and cause the hawking, spitting and gagging, be cause the excessive secretion is not fur

nished from healthy blood. Stuart's Catarrh Tablets contain many of the same valuable antiseptics used in eprays and inhalers, but in-stead of being applied to the inflamed membranes of the nose and throat, they are taken into the stomach and thus reach the blood, the real seat and cause

Stuart's Catarrh Tablets are large

pleasant tasting lozenges, composed of Red Gum, Hydrastan, Bloodroot, and similar catarrh specifics, and so safe to use that little children suffering from colds take them with same beneficial

results as adult persons.

No trace of cocaine or opiates, so common in catarrh medicines, can be found in Stuart's Catarrh Tablets.

port coal it is on the basis of a legal ton of 2,240 pounds. "3. The excessive ton was originally intended to compensate the operator for the weight of small sizes of coal

which were then discarded, but which are now utilized and sold, and therefore, there is no present necessity for the use of any other than the legal ton. "4. The adoption of this system would remove an incentive, both to the operator and the worker to cheating and dishonesty and would allay jealousy among the miners and prevent un-just discrimination and favoritism. "5. The change of the present sys-tem to the one asked for would prove a strong factor in allaying suspicion

and discontent among the mineworkers NATURE OF AGREEMENT. "Fourth. The incorporation in an

agreement between the United Mine Workers of America and the anthracit coal companies of the wages which shall obtain, together with satisfactory methods for the adjustment of grievances which may arise from time to time, to the end that strikes and lockouts may be unnecessary.

IN SUPPORT OF DEMAND. "In support of this demand we sub-

mit the following reasons:
"I. The anthracite mineworkers should not be compelled to make or sign individual agreements, but should have the right to form such organization and choose such agents and offi-cers as they desire to act collectively instead of individually when they deem that their best interests are subserved thereby. "2. Agreements between employers and employes through work-ingmen's organizations are the

production and wages in the bitumi coalfields and in other large industries and are beneficial, successful and in eping with the spirit of the times.
"3. Unions of workingmen tend the better discipline of the men and to the improvement of their physical

moral and mental condition and to the preservation of friendly relations between employer and emploe.

"4. Experience shows that the trade agreement is the only effective method by which it is possible to regulate ques-tions arising between employers and employes in large districts and that a trade agreement is the only possible way to establish the relations between the employers and the wagemaker in the anthracite fields on a just, perma nent basis and as far as possible to de away with any causes for the recurrence of such difficulties as those you (the

anthracite coal strike commission) have been called in to settle. "Respectfully submitted.
"JOHN MITCHELL, Representative of the Anthracite Mine Workers."

BIDS FOR SALTAIR BEACH.

Rids will be received at the company's office in the Nsuvoo Block, No. 51½ West ist south treet, until moon, Wednesday, the 12th day of November, for the excavating of a trench 4x7 feet, about 6,000 feet long at saltair Beach. Specifications and drawings may be seen at the above named office.

The company reserves the right to reject any and all bids.
